INTEGRATING LEAN, SIX SIGMA & ARTIFICIAL INTELLIGENCE

MASTERCLASS INTRODUCTION

For the last 2 years Artificial Intelligence is being increasingly integrated with Lean and Six Sigma. It is important for senior management and managerial staff to understand what can be done with the excellent tools available today to everyone including your competitors. To stay in tune with the times, this Masterclass will explore the possibilities of improving your processes, reduce costs, cut down waste, defects and errors and enhance customer satisfaction and profits across all the industry domains, be it manufacturing or services.

KEY BENEFITS TO ATTEND

- Understand the recent developments in process excellence
- Understand what does Lean, Six Sigma and Artificial Intelligence (AI) mean to senior management and CXOs
- Get most out of Lean, Six Sigma and Artificial Intelligence
- Understand Robotics Process Automation (RPA)
- Learn how to integrate Lean and Six Sigma with RPA to reduce costs and defects
- Improve efficiency and customer satisfaction through integration
- Create a roadmap for integrating Lean Six Sigma and AI
- Learn from case studies
